PROFILE

Early-career applicant interested in AI governance, technology policy and practical AI evaluation. Building hands-on experience through small web and Python projects, structured learning, and operational work in a printing and packaging environment. Brings practical coordination, quality-checking and communication experience, with a strong interest in responsible AI.

WORK EXPERIENCE

Printing Operations Support — Majan Printing & Packaging | Ras Al Khaimah, UAE

18 August 2026 – Present

• Check and count materials and support accurate material handling.

• Coordinate with managers and clerks about work requirements, timing and next steps.

• Help arrange material loading and complete related paperwork.

• Guide and support a co-worker with daily tasks.

• Spotted inconsistent box colour shades within a pallet, reported the issue to the supervisor, and helped trigger a return to production for correction.

PROJECTS

AI Governance Control Centre — Prototype for recording AI risks, incidents and corrective actions. View project

Majan Printing Website — Website project for a printing and packaging business. View project

WillYouBeMine — Interactive personal web development project. View project

SKILLS

Work: material checking, quality observation, task coordination, documentation and co-worker guidance.
Digital: basic Python, beginner web development, HTML/CSS/JavaScript practice, basic Excel and Google Sheets, practical use of AI tools.
Developing: AI governance concepts, structured analysis and technical problem-solving.

EDUCATION

Class 12 (Biology / Science) — Gyanodaya Model Secondary School | Completed 2023
